CRESCENT ISLAND

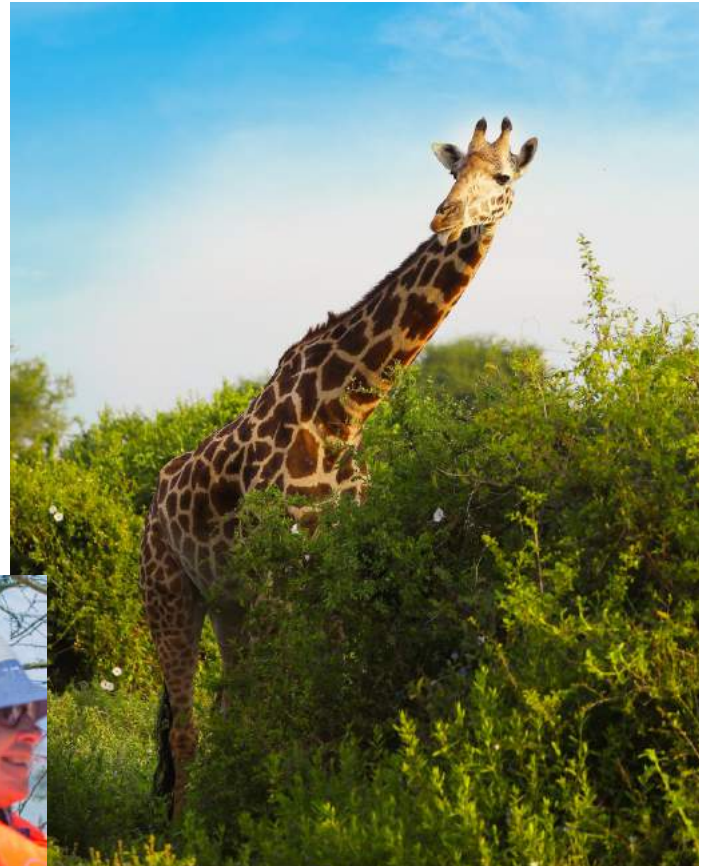

Naivasha's Best Kept Secret

BY: EDITORIAL TEAM

This private sanctuary located on Lake Naivasha boasts more animals per acre than any other park in Kenya. Here, you get to walk among the yellow barked “fever trees” as well as with the park animals, some of which include giraffes, zebras, Thompson's and Grant's gazelles.

Gliding waters, cloudy waves, lake skies and unending horizons explain the beauty of the Island in a glimpse. An excursion to this sanctuary is the only way to take in the spectacular beauty of its majestic landscape.

Crescent Island is accessible much faster by water, in which case a boat safari can be organised from the lakeshore of Enashipai Resort & Spa. The guides give a detailed tour, helping you spot hippos and waterbucks along the way to the Island.

One of the most interesting facts about this spectacular conservancy is that it is not at all inhabited by flesh-eating mammals. All the wildlife sited here are herbivores, which gives you the advantage of walking through the park, as close as is advisable to the wildlife.

Book a trip to Crescent Island today:

Speak to our Guest Relations Officer at the reception desk, call us on **+254 719 051000**, or email **sales@enashipai.com**.

Q: How has the resort's unique setting and some of its amenities influenced your approach to hospitality in your new role?

A: The resort's proximity to the lake provides the potential for a lakeside breakfast, which is something I'd like to implement. The club house also presents an exciting opportunity for a BBQ area - something I would definitely consider adding to improve our guest experience.

Q: Starting a new position can be both exciting and challenging. Can you tell us about any strategies or routines you've adopted to help you acclimate quickly to the resort's culture and environment?

A: Stepping into a new role ignites both excitement and challenges. To quickly adapt to the resort's culture and environment, I follow some tried-and-tested strategies. A: During my leisure time, I enjoy watching soccer, swimming, and working out. Such activities help me find relaxation outside of the culinary world.

MT. LONGONOT

Fun Facts

1

Mt. Longonot, a Kenyan stratovolcano, gets its name from the Maasai word 'Oloonong'ot', meaning "mountains of many spurs" or "steep ridges".

3

A miniature forest decorates the crater floor, amidst a variety of wildlife like zebras, giraffes, gazelles, and buffaloes.

4

Boasting a vast 8 x 12 km caldera from eruptions 21,000 years ago, this mountain is geologically active and fascinating.

2

The mountain features a challenging 13.5 km hiking circuit, that can be completed in approximately 4-5 hours.

5

A 2009 bushfire created a dramatic, albeit dangerous spectacle, briefly transforming the peaceful mountain landscape.
